

NAME: Prasanna K
ROLL NO: 240701396

ASSIGNMENT 03:

REPORT CONFIGURATION AND VISUALIZATION FOR LIBRARY MANAGEMENT SYSTEM

Aim:

To configure and demonstrate different report views in the Library Management System using Zoho Creator, so that book issue requests can be browsed, compared, tracked by date, grouped by semester and viewed geographically.

Objectives:

1. To display book issue request records in a clear and structured report.
2. To configure Calendar, Timeline, Spreadsheet, Kanban and Map views using existing report data.
3. To make request dates, due dates, issue details and hostel locations easier to review.

Procedure:

1. List View Configuration:

Create and review the Book Issue Request Report in a row-based layout. Display fields such as Member Name, Book Category, Member Type, Number of Copies, Issue Status and Request Submitted On. Additional columns include Due Date, Books Returned, Fine Amount, Hostel Address, Semester and Request Identifier, which can be inspected by scrolling horizontally.

2. Calendar View Configuration:

Select Calendar as the report view. Set Event title to Member Type, Event starts on to Request Submitted On and Event ends on to Due Date. The monthly calendar organizes requests by date and makes their scheduled periods easier to review.

3. Timeline View Configuration:

Select Timeline and set Member Name as the event title, Request Submitted On as the start date and Due Date as the end date. This presents requests along a time scale and helps compare their start and due dates.

4. Spreadsheet View:

Use the spreadsheet-style grid to inspect record values across rows and columns. Review issue details and additional fields together, moving horizontally across the report when more columns are needed.

5. Kanban View Configuration:

Choose Kanban and group the columns by Semester. Each request is displayed as a card within the relevant semester column, showing member and category information in a visual board layout.

6. Map View Configuration:

Choose Map and use Hostel Address as the location field. The map shows location markers and provides search, zoom and map-layer controls. Selecting a marker displays the associated member or request details.

Procedure - List View

The list report provides a quick view of book issue records in rows. The screenshots show the main request fields and further columns containing due dates, fine details and related information.

Member Name	Book Category	Member Type	Number of Copies	Issue Status	Request Submitted ...
Eva Patel	Non-Fiction	Student	4	Overdue	07-Oct-2026 14:20:00
David Lee	Journal	Student	2	Overdue	07-Oct-2026 13:00:00
Carol Martinez	Reference	Staff	5	Approved	07-Oct-2026 11:45:00
Bob Williams	Reference	Student	1	Issued	07-Oct-2026 10:30:00
Alice Johnson	Reference	Student	3	Issued	07-Oct-2026 09:15:00

Figure 1: List View of the Book Issue Request Report

Request Submitted ...	Due Date	Books Returned	Fine Amount	Hostel Address	Semester	Request Identifier
-2026 14:20:00	14-Oct-2026	false	\$ 0.00	Room 503, Block E	Semester1	5
-2026 13:00:00	14-Oct-2026	false	\$ 0.00	Room 102, Block D	Semester3	4
-2026 11:45:00	14-Oct-2026	false	\$ 5.50	Room 410, Block C	Semester3	3
-2026 10:30:00	14-Oct-2026	false	\$ 0.00	Room 205, Block B	Semester2	2
-2026 09:15:00	14-Oct-2026	false	\$ 0.00	Room 301, Block A	Semester4	1

Figure 2: Additional Request Fields in the Report

Procedure - Calendar View

The Calendar view is configured with Member Type as the event title, Request Submitted On as the start date and Due Date as the end date. It presents the request periods in a monthly calendar format.

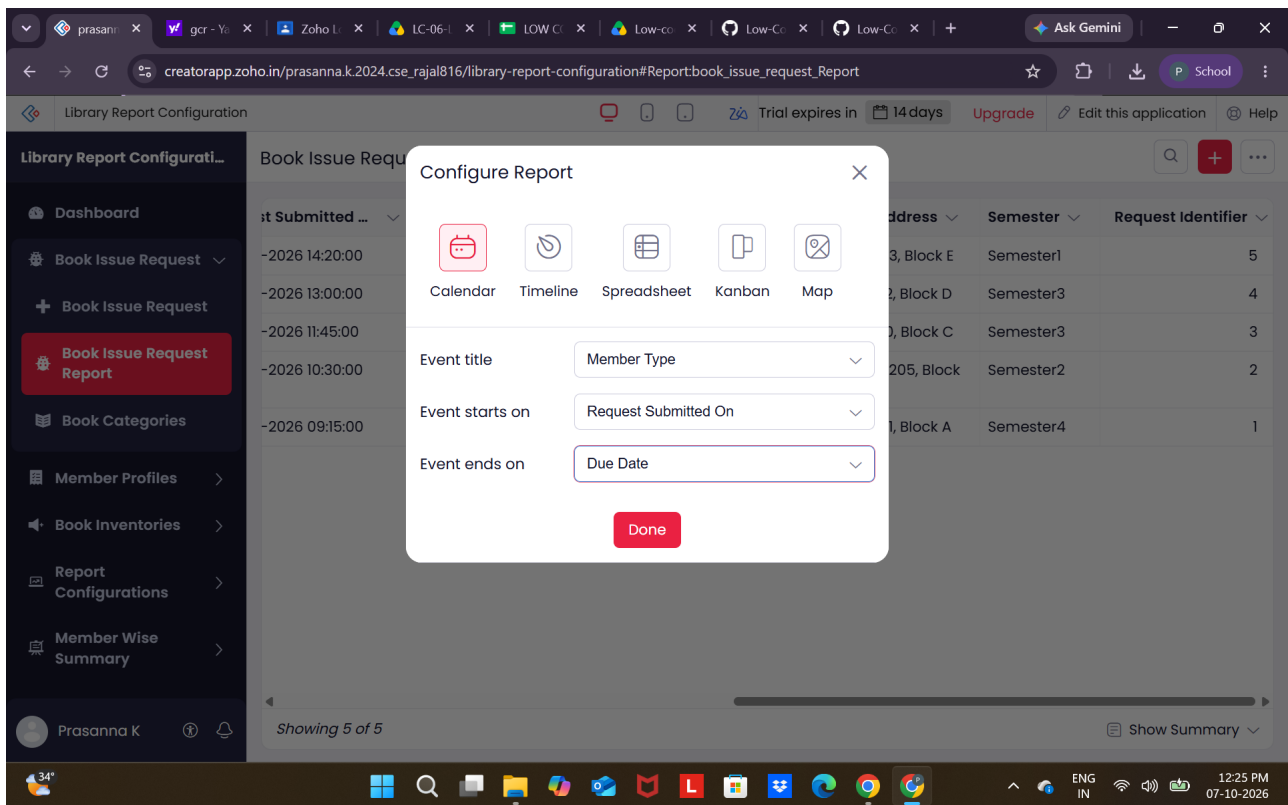

Figure 3: Calendar View Configuration

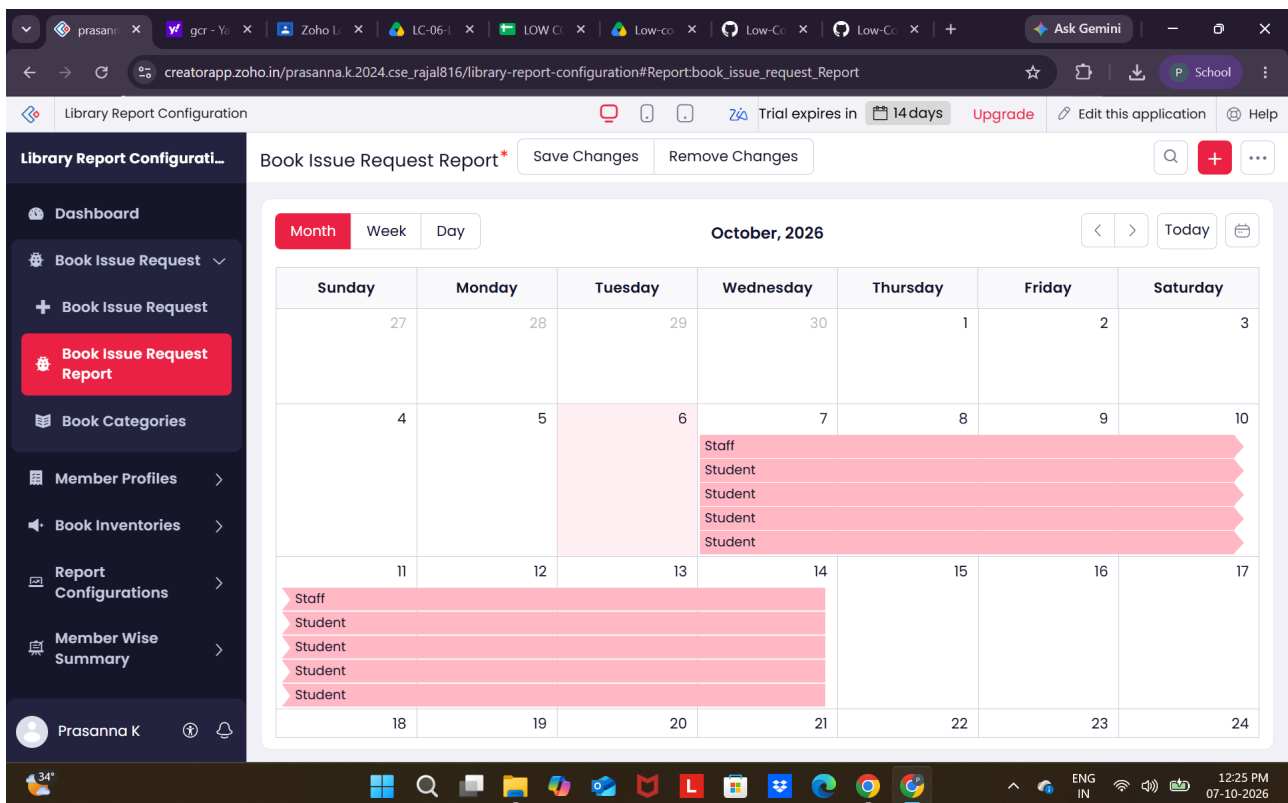

Figure 4: Monthly Calendar View of Book Requests

Procedure - Timeline View

The Timeline view uses Member Name as the event title and displays each request from Request Submitted On through Due Date. The configured time range makes the request schedule easier to compare.

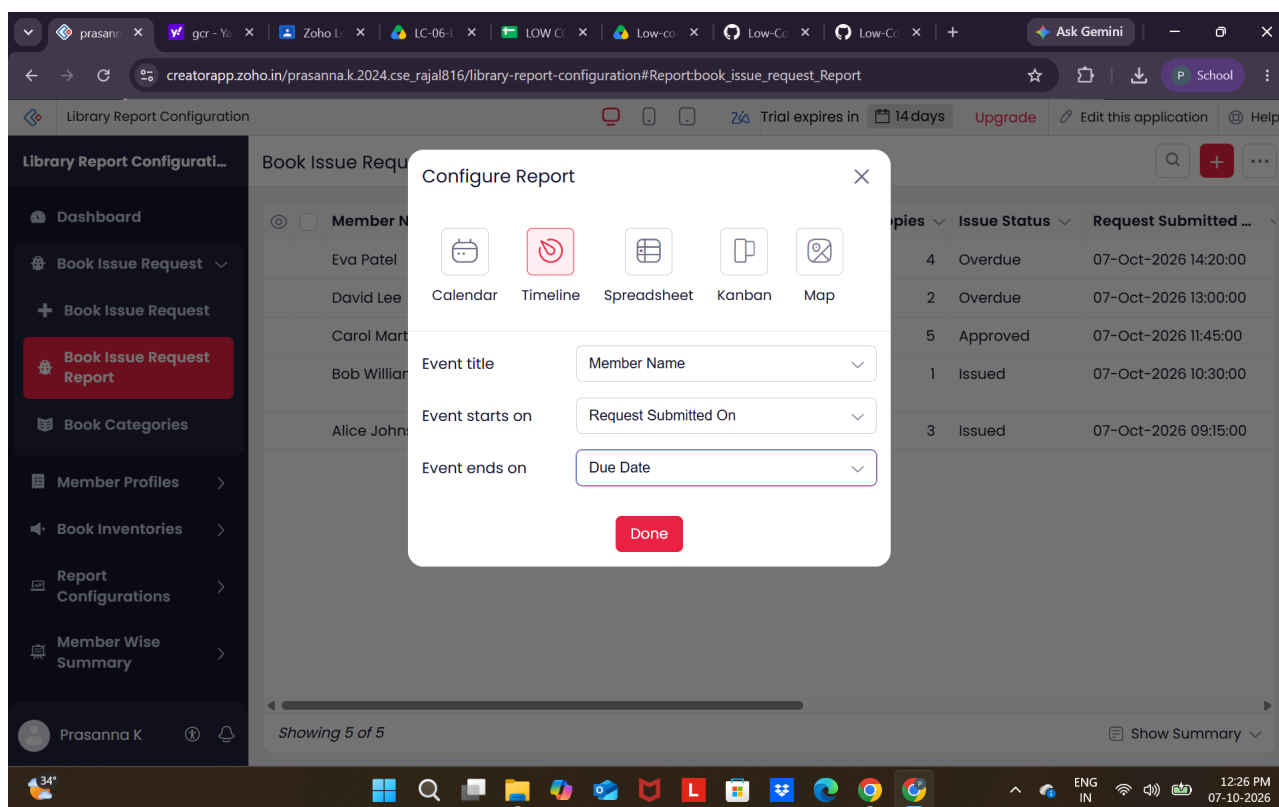

Figure 5: Timeline View Configuration

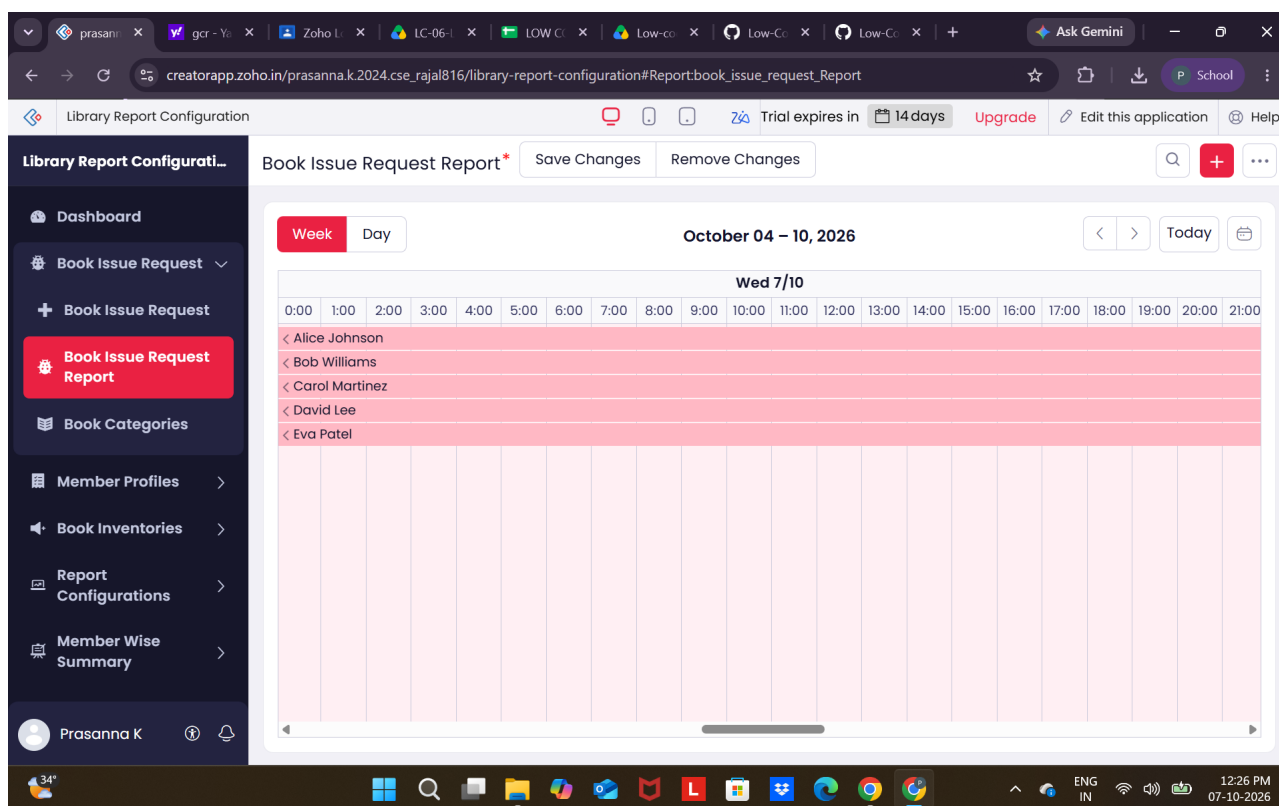

Figure 6: Timeline View Showing Members and Request Dates

Procedure - Spreadsheet View

The Spreadsheet view arranges request information in a grid, making it practical to compare values across records. The displayed columns include member details, category, member type, copy count and issue status, along with date and fine information.

	Member Name	Book Category	Member Type	Number of Copies	Issue Status
1	Eva Patel	Non-Fiction	Student	4	Overdue
2	David Lee	Journal	Student	2	Overdue
3	Carol Martinez	Reference	Staff	5	Approved
4	Bob Williams	Reference	Student	1	Issued
5	Alice Johnson	Reference	Student	3	Issued

Figure 7: Spreadsheet-Style View of Book Issue Records

	Request Submitted On	Due Date	Books Returned	Fine Amount	Hostel Address
1	07-Oct-2026 14:20:00	14-Oct-2026	☐	0.00	Room 503, Block E
2	07-Oct-2026 13:00:00	14-Oct-2026	☐	0.00	Room 102, Block D
3	07-Oct-2026 11:45:00	14-Oct-2026	☐	5.50	Room 410, Block C
4	07-Oct-2026 10:30:00	14-Oct-2026	☐	0.00	Room 205, Block B
5	07-Oct-2026 09:15:00	14-Oct-2026	☐	0.00	Room 301, Block A

Figure 8: Request Dates, Due Dates, Fines and Hostel Addresses

Spreadsheet View - Continued

Further columns show the Books Returned value, Fine Amount, Hostel Address, Semester and Request Identifier.

	Books Returned	Fine Amount	Hostel Address	Semester	Request Identifier
1		0.00	Room 503, Block E	Semester1	5
2		0.00	Room 102, Block D	Semester3	4
3		5.50	Room 410, Block C	Semester3	3
4		0.00	Room 205, Block B	Semester2	2
5		0.00	Room 301, Block A	Semester4	1

Figure 9: Additional Columns for Semester and Request Identifier

Procedure - Kanban View

The Kanban report is grouped by Semester, so each record can be seen as a card in its corresponding column.

	Books Returned	Fine Amount	Hostel Address	Semester	Request Identifier
1		0.00	Room 503, Block E	Semester1	5
2		0.00	Room 102, Block D	Semester3	4
3		5.50	Room 410, Block C	Semester3	3
4		0.00	Room 205, Block B	Semester2	2
5		0.00	Room 301, Block A	Semester4	1

Figure 10: Kanban View Configuration Grouped by Semester

Kanban View - Report Display

The board separates the records into semester columns. The cards show member names and book categories, allowing requests to be reviewed visually by group.

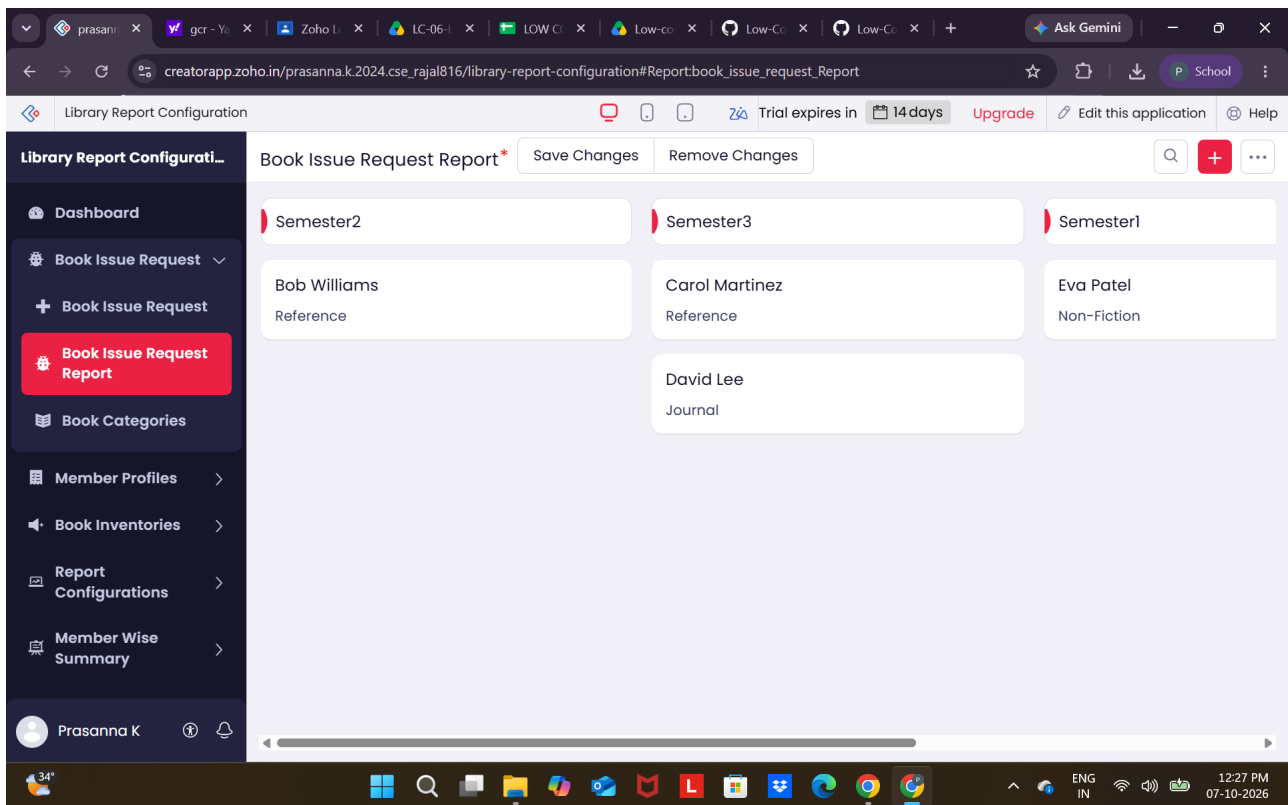

Figure 11: Kanban Board Displaying Request Cards

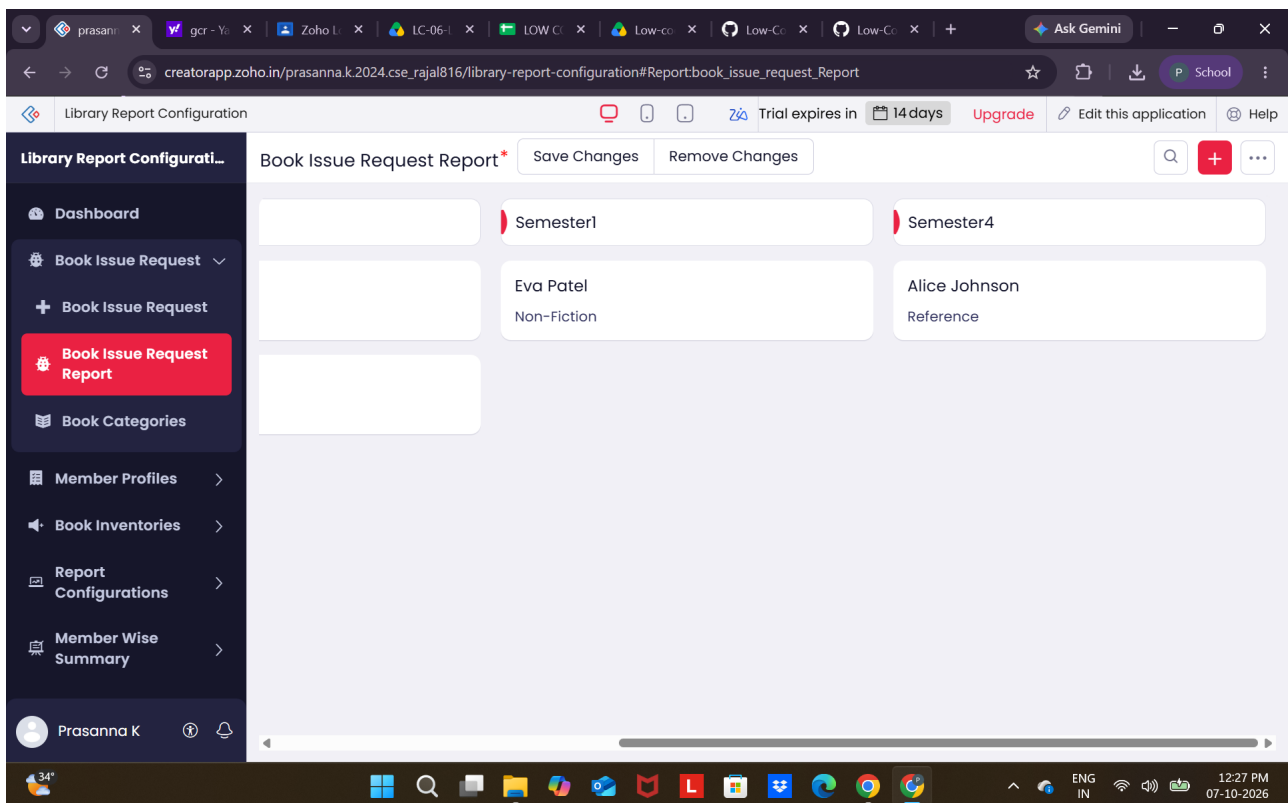

Figure 12: Kanban Cards Grouped into Semester Columns

Procedure - Map View

The Map view uses Hostel Address to locate each record. Search and zoom controls help navigate the map, and clicking a marker can show the associated member details.

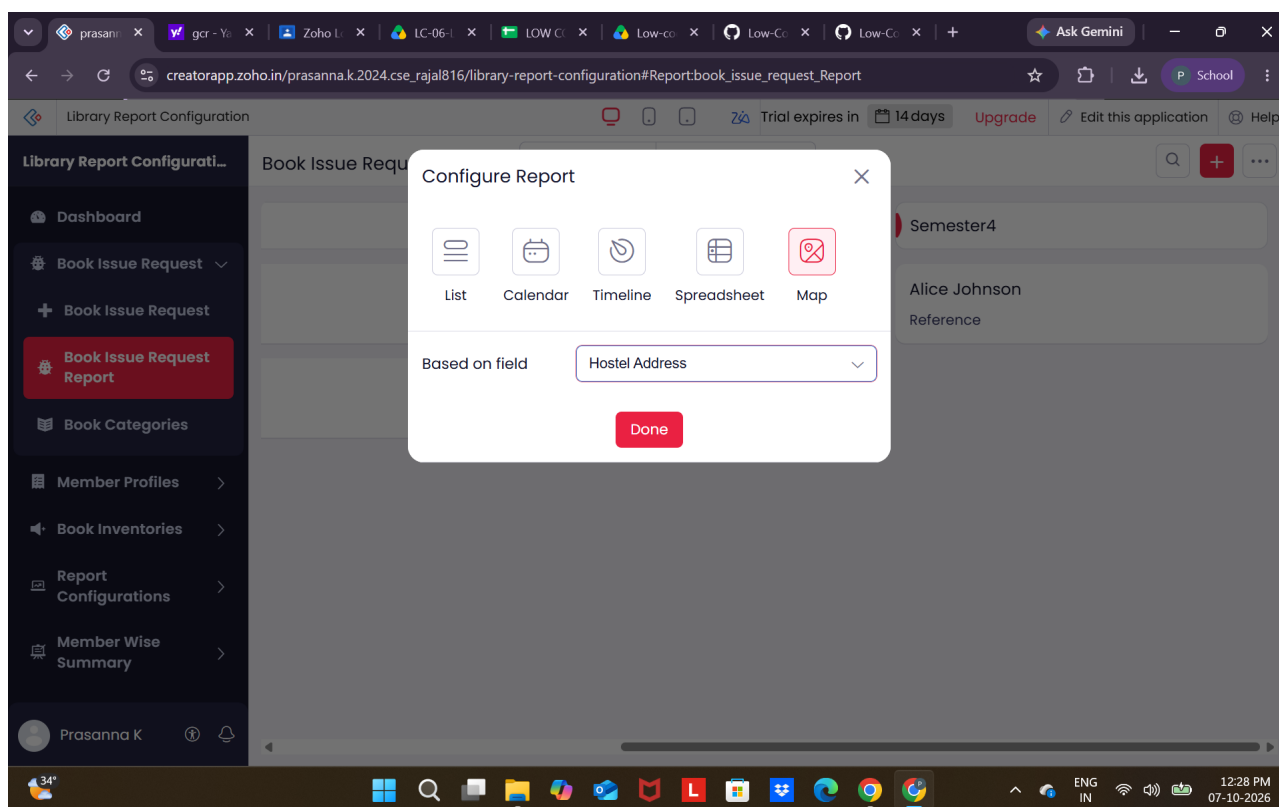

Figure 13: Map View Configuration Using Hostel Address

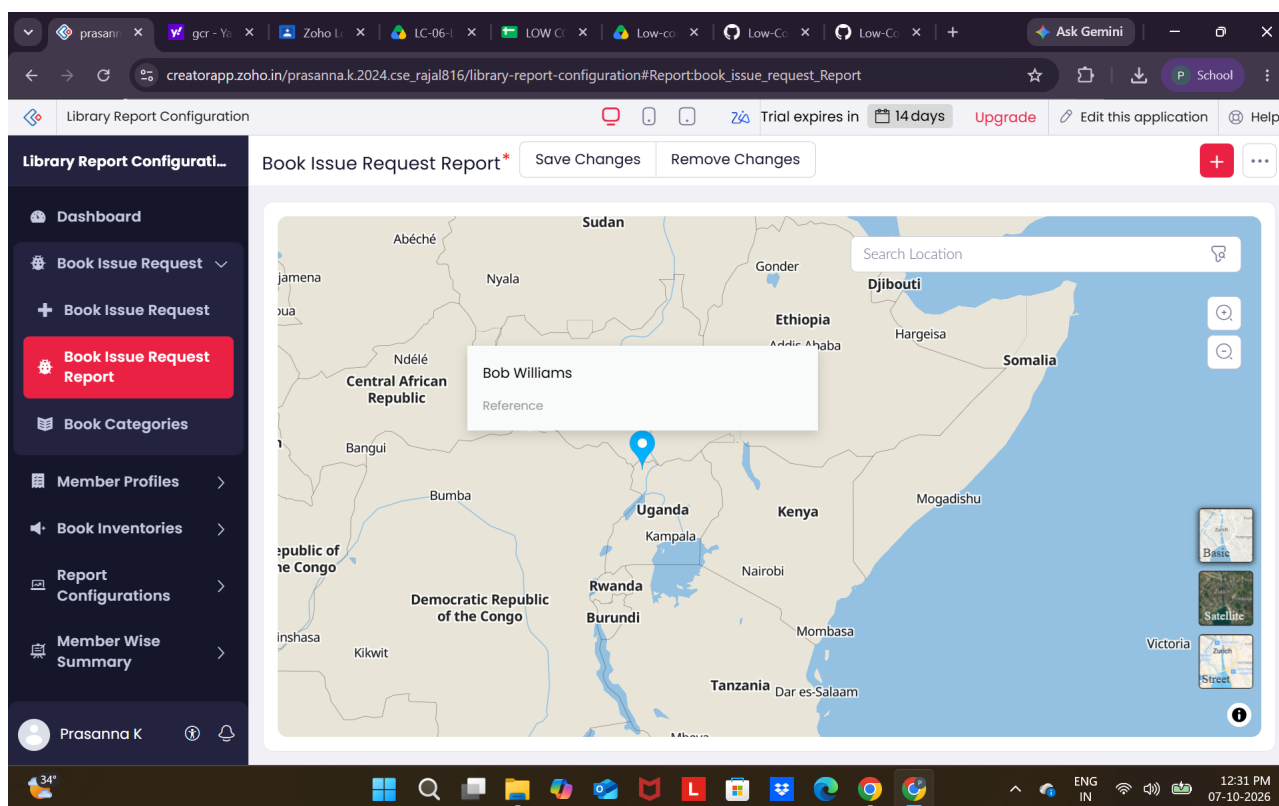

Figure 14: Map Marker Displaying a Member Record

Map View - All Hostel Locations

The consolidated map displays multiple location markers together, providing an overall view of the hostel addresses stored in the report.

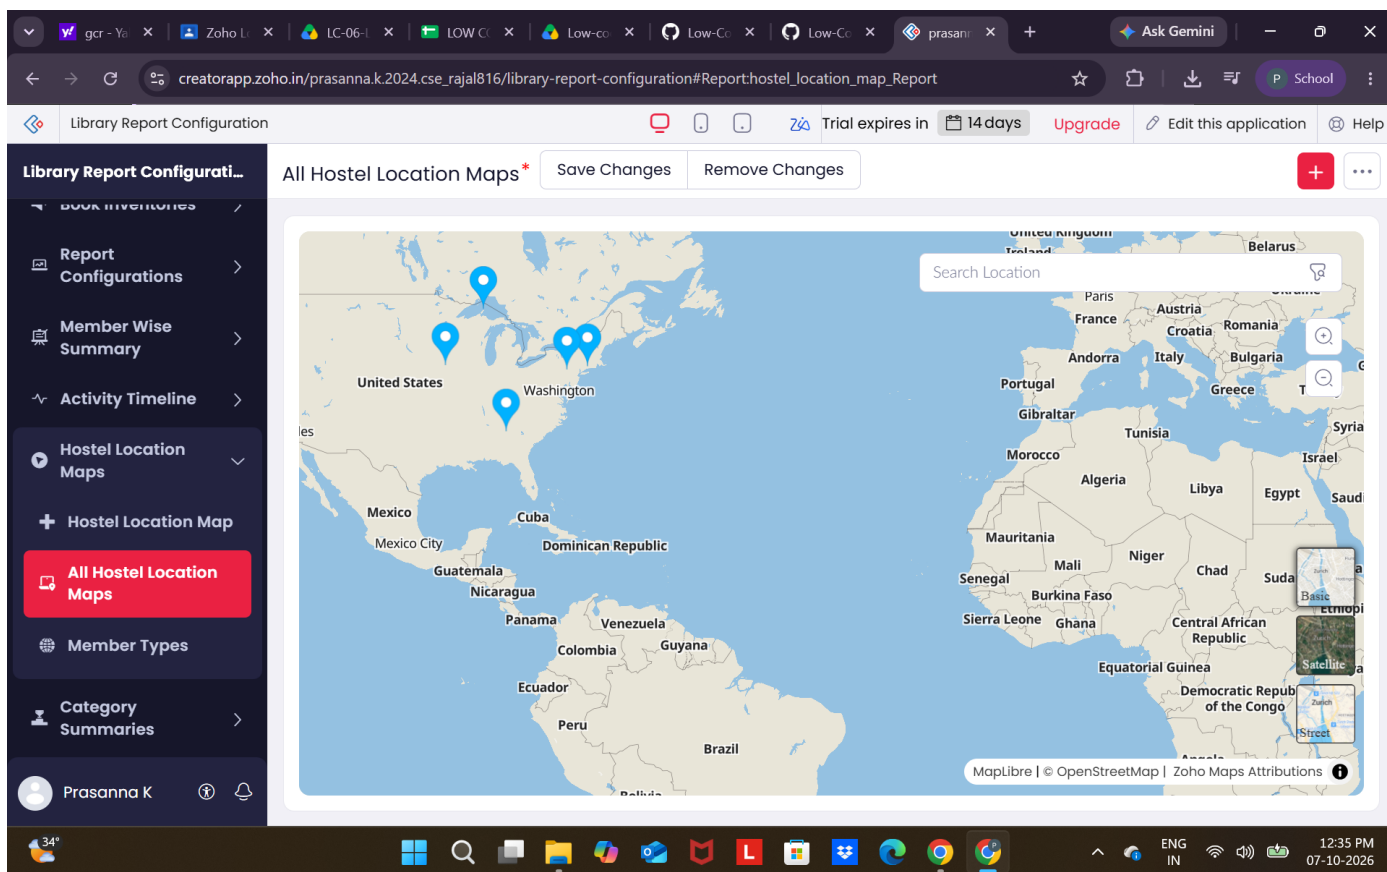

Figure 15: All Hostel Locations Displayed on the Map

Result:

The Book Issue Request Report was configured and demonstrated using List, Calendar, Timeline, Spreadsheet, Kanban and Map views. The different layouts support structured browsing, date-based tracking, grid-based comparison, semester-wise grouping and geographic visualization of hostel locations.
