

LAB EXERCISE 4: REPORT GENERATION AND VISUALIZATION FOR HOSPITAL MANAGEMENT SYSTEM

Aim

To generate and view hospital management reports in Zoho Creator and use dashboard and tabular views to analyse appointments, billing information and other hospital records.

Procedure

Open the Hospital Management System application in Zoho Creator and access the dashboard and available report views. Observe the summary cards, graphical information and tabular records. Verify the displayed patient, doctor, department, appointment date, time and status details.

Dashboard Summary and Analytics

The dashboard provides a consolidated view of the hospital system. Summary cards display amounts, prices, daily charges and the total number of appointments, while charts provide a quick view of activity.

Appointment Status Report

The appointment view shows the status of each appointment, including completed and cancelled records, along with their department, date, time and reason.

Doctor	Department	Appointment Date	Appointment Time	Reason	Status
1	Cardiology	22-Sep-2026	08:30:00	Emergency care for minor injury	Completed
2	Neurology				
3					
4					
1	Cardiology	21-Sep-2026	15:45:00	Consultation for persistent headaches	Cancelled
2	Pediatrics				
3	Neurology				
4	Orthopedics				
2	Cardiology	21-Sep-2026	14:00:00	Annual physical examination and vaccination	Completed
3	Pediatrics				
4	Neurology				
4	Orthopedics				
1	Cardiology	20-Sep-2026	10:30:00	Follow-up for chronic back pain	Cancelled
2	Pediatrics				
3	Orthopedics				
4					
1	Pediatrics	20-Sep-2026	09:15:00	Routine checkup for flu symptoms	Completed
2	Neurology				
3					

Figure 3: Appointment Report with Status Information

Dashboard with Detailed Appointment Records

The dashboard provides detailed appointment records below the graphical summary, showing patient, doctor, department, date and time information.

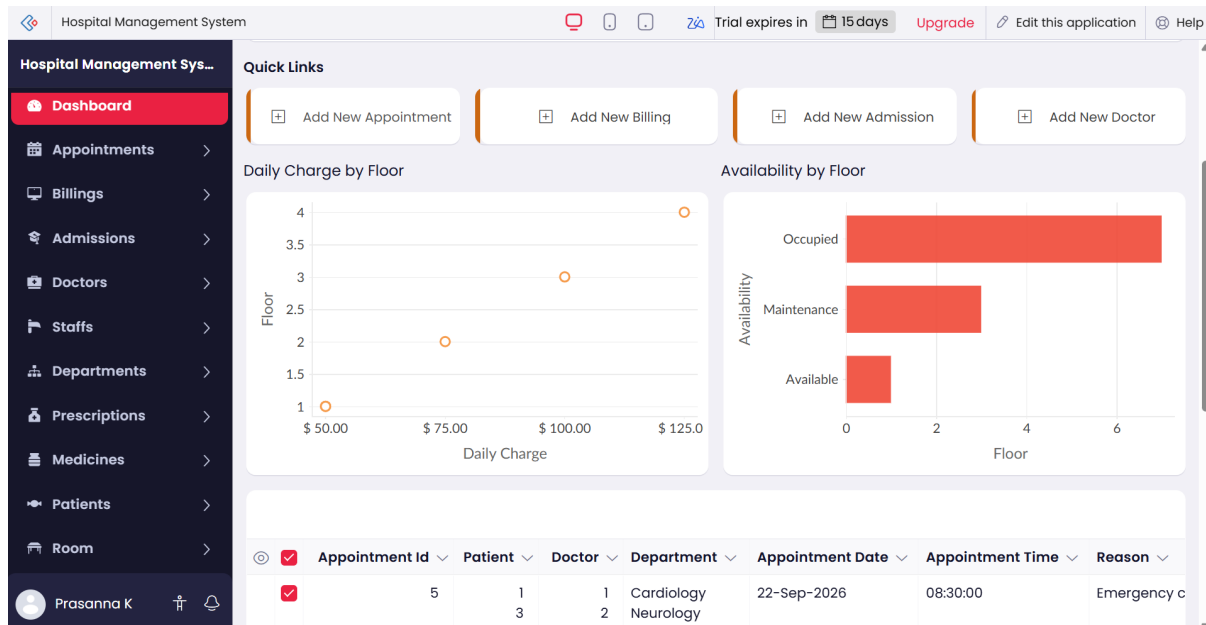

Figure 4: Dashboard Analytics with Appointment Records

EXPORT APPOINTMENT STATUS REPORT

The Statuses report provides an export option for appointment records. The export window allows the file name, output format and required report columns to be selected.

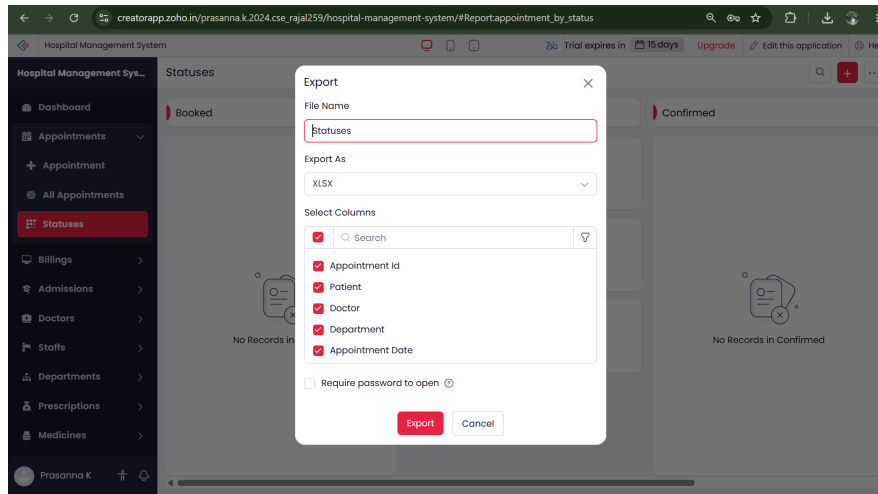

Figure 5: Export Appointment Status Report

IMPORT DATA INTERFACE

The All Appointments section provides an Import Data option for adding appointment records to the application using local storage, URL, cloud service or pasted data.

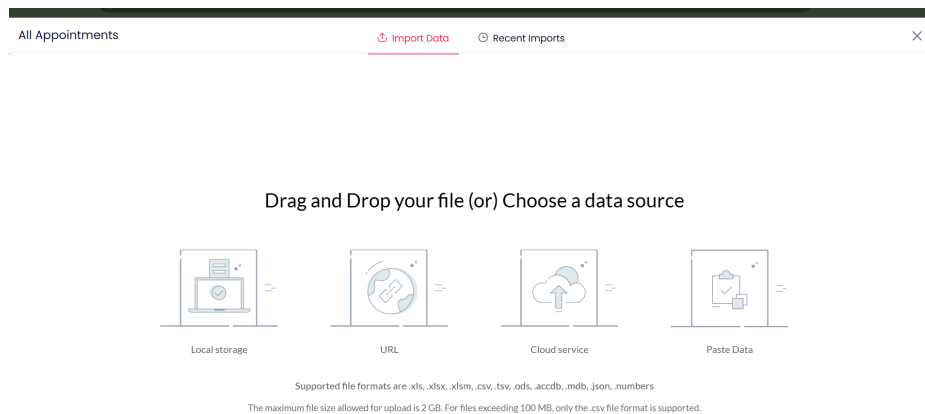

Figure 6: Import Data Interface

ALL APPOINTMENTS STATUS VIEW

The All Appointments view groups records by status such as Booked, Completed and Confirmed, providing a quick view of the current appointment status.

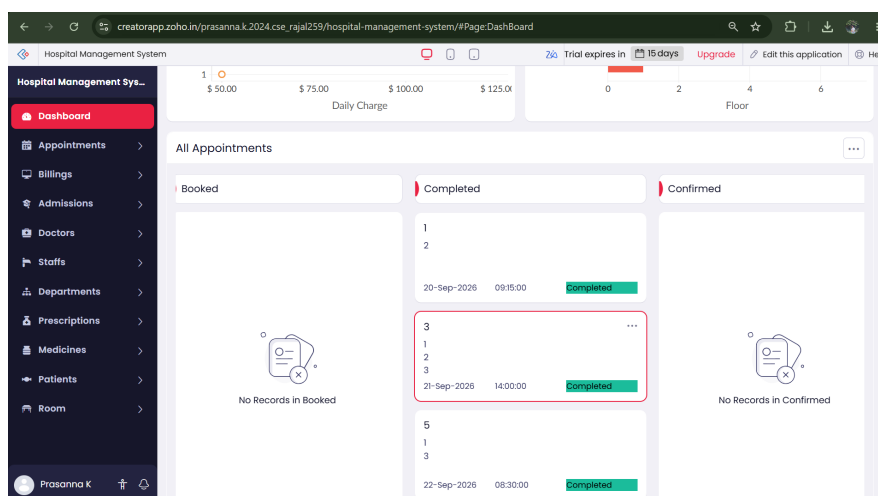

Figure 7: All Appointments Status View

WEEKLY APPOINTMENT CALENDAR

The weekly calendar displays appointments according to the selected week and time slots, making the schedule easy to review.

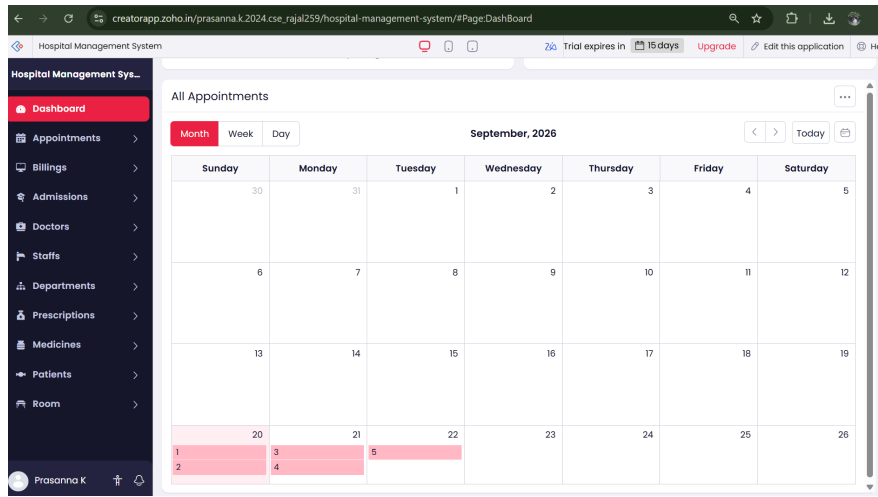

Figure 8: Weekly Appointment Calendar

MONTHLY APPOINTMENT CALENDAR

The monthly calendar displays appointment records under their respective dates, providing a clear monthly schedule.
